

# INTERCEPT Foam™ *Integrated Corrosion Protection for Existing Systems*

Intercept Technology™ has eliminated the need for oils, chemicals, and other coatings to protect and preserve products for over 30 years. **Intercept Foam™** is the next evolutionary step for applications where heat-shrinking or other common applications are impossible such as cabinets and compartments. Intercept Foam™ has a massive surface area, thanks to its sponge-like properties, which reduces and neutralizes harmful gases in the smallest or largest of spaces and can be effortlessly integrated within existing systems.

Once the Intercept™ functionality of the foam is depleted, it will change color.

## Depleted Foam

## New Foam

Our specialists are available to answer any questions you may have concerning corrosion protection and possible cost-savings in the corrosion preservation process.

**CORROSION PROTECTED**

**100% Reliability**  
Corrosion Prevention for all Applications

**Efficient**  
Intercept Technology™ saves Time and Money.

**Oil Free**  
No more need to oil. Ready for action.

**Environmental**  
Saves resources and protects the environment.
